Even though this game had some rough patches here and there i enjoyed this game. the art style is amazing the gamplay works and its overall a relaxing game. on the other hnad like what others have stated some maps have some hard to navigate or impassible areas. i myslef have not run into this problem but i can see why their frustrated.. As in the description The Elite Units of the East DLC adds 12 new elite units to the Maratha and Ottoman factions. A greater variety of available units is always welcome. If you like one of these factions you'll love this add-on.. Lumo it's a perfect homage to 8-bit classics using the Filmation-II engine, such as Knight Lore and Head over Heels (ZX Spectrum, MSX, Amstrad CPC and others) Cadaver (Amiga) and, most prominently, Solstice (NES). It's everything there, including the fixed camera angles, cute graphics and puzzles made difficult because of perspective ambiguity. Lumo is VERY retro - probably kids raised on polygonal third-person view games can't really grasp this game - but if you were playing adventure games in the 1980s you'll certainly love this one.. There is potential here, I want you to keep that in mind, because down the road this game could be interesting. There's a couple of interesting mechanics with the explorer units and exploiting resources, and the diplomacy portion could be interesting in terms of holding off people attacking you. This definitely can change based on what options become available, and I will keep my eye out on this one.

But the game is FAR too slow. Missing keyboard shortcuts is brutal, as everything is mouse driven. A hundred turns in, no one has attacked each other: no one can. The first 50 turns is slow going yet essential. There's missing information to know exactly what you're building. Missing UI elements to know what your status is. You feel disconnected from the experience. Lack of additoinal sounds loses immersion.

For more gameplay and Impressions/Details, look at the video here: <http://youtu.be/fhxTq1VSwis>. Although I have only played a short while on this game it is very cute and like loads of other people have said it has potential, though having a drifting system like Sonic and All-stars Racing Transformed would be cool, other than that I have only found 1 real bug n that is that Xbox360 controller controls are abit buggy, the only visual disadvantages is the game does not currently support 4K (2160P) resolution, other than those, it is a thoroughly enjoyable game and very cute, kitty cat 🐱🐱 cute and Free Roam, could be a suggestion but they could in the future make a large map with a city and country side and places to explore and hidden Scout mice to find and missile doggies, so yes recommend this game 🐱🐱. She's dabbing on the card pack, nobody can tell me otherwise. It's a fun time killer. I played Dark Scavenger and had alot of fun with that game so was curious about this platform game from the same developer. As someone who grew up with old school platformers I gotta say this is one of the best platformer games I've ever played. The levels are always interesting with new mechanics thrown in as you progress. The checkpoints are frequent and deaths always feel like your own fault. I'm also really digging the story that is well integrated into the gameplay and never slows things down. I totally recommend this game and advise anyone that's into fast challenging platformers to try this game out. Within the first 15 minutes you'll know if this game is right for you and I'm glad I picked it up.

This game is actually pretty good. It's so broken.
The AI spawn with like a million units and kill you so fast.
Your own teammates can launch headcrab cannisters at your stupid base.
Your game it's so bad

jk sick game you should get it, hilarious with friends. Well made but poorly designed, being a shape where my four corners stick out make reacting to incoming attacks much less incentivized even though you can do it. An easy fix would be to make me die when the shapes get past the bigger square kind of like in DDR. Also, I have to wait like 5 seconds or 2 seconds for the shapes to spawn and I think that wait time is just not needed.. Swinging and single again -- despite the happy-ending of our previous entry -- Larry Laffer suits up for a (mostly) all-expenses paid vacation to the 'La Costa Lotta Resort'!
Our loveable loser is hornier than ever and chatting up the babes in Al Lowe's first 'Talkie' adventure -- which introduces Jan Rabson as Larry, and supports a full voice cast as well as narration by Neil Ross.
Help Leisure Suit Larry work his way through the guestlist and to ultimately discover if true love is anything more than a sham or a pain?

While other kids grew up on a King's or a Space Quest -- or maybe taking in a Phantasmagoria with a 7th Guest at the 11th Hour -- I was beating feet to the mean streets and looking for love in all the wrong places with 'Leisure Suit Larry'!

This package contains both versions (VGA & SVGA as beta) and BOTH are Talkie.
The SVGA version (Library>LSL6>Properties>Betas) offers a far superior experience for modern computers -- though its default settings are way over-speed, so this must be adjusted under the "Controls" menu. The Music Volume will also reset to max every replay, and must be adjusted every time.
The VGA version is inferior, with graphics on par with LSL1 & 5. It is a bad ScummVM port with wonky mouse pointer issues making it nearly-unplayable.. Great little side scrolling brawler with a deceptively simple deep combat system for combos and area control.
Each character has their own move sets and the artwork is well done.
Game is a little short but it has some decent replayability with friends.
The writing is funny and gave me a couple good laughs.
If you want a good cheap brawler reminiscent of Golden Axe or even Castle Crashers give Dungeons: The Eye of Draconus a try.. I recieved everything from the DLC except the black mask.
I kinda bought it just for that black mask just not to get it.
The pack overall is alright, the emotes are great.

I WANT THAT BLACK MASK!!

I enjoyed playing this a lot but probably wouldn't recommend it to others due to all the issues. It feels a bit like an abandoned early access game.

Pros:

- Lots of busy work - wash the dishes, take out the trash, prep ingredients, rearrange your storage, etc. There's always something to do. The game gives you lots of time before and after work time to get everything organised.
- Lots of new ingredients, meals, customers and upgrades keep it fun for a long time. Cons:
 - Customers will just come in and order things you've never made before, and there's no help with figuring out the recipes. You end up just buying everything because you have no idea what you need which makes storage a nightmare.
 - As the ingredients you can buy are random each day, you often are unable to buy core ingredients. E.g. at the start a lot of your recipes are tomato based but you can go days without being able to buy more tomatoes.

-
- The game will randomly handicap you and there's no way of playing around it. Sometimes the machines break for half the day and that's it - they're just broken and you can't make anything. You just have to stand there and wait til it's over. I got a notice saying there won't be many customers that day, and then you only have 2-3 customers that day. Nothing you can do about it.
 - Laggy. It starts off fine but after about 30 mins of playing I get lag that increases in severity the longer I play. It fixes itself if I restart the game but I have to do this constantly.
 - The art style isn't great. It's not the worst thing ever though.
